FARM AND HOME SERVICE
Schedule A - Code 021, 022, 023, 101, 102, 103, 201, 202, 203

Applicable
Throughout the Cooperative's service area, subject to the Cooperative's Rules and Regulations of Service and the Rules of the Wyoming Public Service Commission.

Available
To all members for farm and domestic uses having an installed transformer capacity of 37.5 kVA or less.

Type of Service
Single-phase, 60 hertz, at available secondary voltage.

Monthly Rate

Local Distribution Service
- Grid Access Charge: $38 / month
- Delivery Charge: $0.01548 / kWh
- Peak Capacity Charge: $0 / NCP kW

Transmission Service
- Delivery Charge: $0.01947 / kWh
- Peak Capacity Charge: $0 / NCP kW

Power Generation Service
- Energy Production Charge: $0.06695 / kWh
- Peak Capacity Charge: $0 / NCP kW

Bundled kWh and kW rates (for informational purposes only)
- All kWh: $0.1019 / kWh
- Peak kW: $0 / NCP kW

Tariff Rate Rider
This rate schedule is subject to the Tariff Rate Rider set forth on Sheet Nos. 8, 8a, 8b, 8c and 8d.

Minimum Monthly Charge
The minimum charge shall be the highest of the following:

1. The distribution monthly grid access charge.
2. The contract minimum in accordance with the Cooperative's line extension policy.

Date Issued: June 1, 2019
By: Brian Heithoff
Title: CEO/General Manager

Public Service Commission
Approved
Effective Date of Retail Rates: June 1, 2019
Docket No. 10015-73-CT-19
State of Wyoming
3. Service for stock wells will be billed on an annual basis beginning with the April billing at which time 12 months of the above monthly grid access charge will be billed. In addition, energy usage will be billed in October for energy used during the previous 12 months.

**Determination of Billing Demand (non-coincident peak demand)**

The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter.
TIME-OF-DAY - RESIDENTIAL  
Schedule A - T-O-D  
Code 031, 032, 033

Applicable
Throughout the Cooperative's service area, subject to the Cooperative's Rules and Regulations of Service and the Rules of the Wyoming Public Service Commission.

Available
To all members for farm and domestic uses having an installed transformer capacity of 37.5 kVA or less.

Type of Service
Single-phase, 60 hertz, at available secondary voltage.

Monthly Rate

Local Distribution Service
- Grid Access Charge: $38 / month
- On-Peak Delivery Charge: $0.01548 / kWh (3:00 p.m. to 10:00 p.m.)
- Off-Peak Delivery Charge: $0.01548 / kWh All other hours
- Peak Capacity Charge: $0 / NCP kW

Transmission Service
- On-Peak Delivery Charge: $0.03874 / kWh (3:00 p.m. to 10:00 p.m.)
- Off-Peak Delivery Charge: $0 / kWh All other hours
- Peak Capacity Charge: $0 / NCP kW

Power Generation Service
- On-Peak Energy Production Charge: $0.08949 / kWh (3:00 p.m. to 10:00 p.m.)
- Off-Peak Energy Production Charge: $0.04582 / kWh All other hours
- Peak Capacity Charge: $0 / NCP kW

Bundled kWh and kW rates (for informational purposes only)
- All On-Peak kWhs: $0.14371 / kWh (3:00 p.m. to 10:00 p.m.)
- All Off-Peak kWhs: $0.0613 / kWh All other hours
- Peak kW: $0 / NCP kW

Tariff Rate Rider
This rate schedule is subject to the Tariff Rate Rider set forth on Sheet Nos. 8, 8a, 8b, 8c and 8d.
Minimum Monthly Charge
The minimum charge shall be the higher of the following:

1. The distribution monthly grid access charge.
2. The contract minimum in accordance with the Cooperative's line extension policy.

Determination of Billing Demand (Non-coincident peak demand)
The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

Power Factor Adjustment
The member agrees to maintain a power factor of not less than 90%, and the Cooperative reserves the right to measure such power factor at any time. Should such measurements indicate that the power factor of the member is less than 90%, the member agrees, upon sixty days' written notice, to correct such power factor to 90%, or if the Cooperative shall so elect, the demand for billing purposes shall be the demand as indicated or recorded by the demand meter multiplied by 90% and divided by the power factor.

Conditions of Service
In those cases where it is necessary to extend or reinforce distribution lines, service will be furnished only under the following conditions:

1. The member shall give satisfactory assurance supported by a written agreement for a period of not less than five years.
2. Motors having a rated capacity in excess of ten horsepower must be three-phase.
3. All wiring, pole lines, wires, and other electrical equipment beyond the service point will be considered the distribution system of the member and shall be furnished and maintained by the member.
4. Capacitors are required on motors of 20 horsepower or greater.

2:00 TO 10:00 TIME-OF-DAY - IRRIGATION (continued)

On-peak Time
The on-peak timeframe for this rate is 2:00 p.m. to 10:00 p.m.

Tariff Rate Rider
This rate schedule is subject to the Tariff Rate Rider set forth on Sheet Nos. 8, 8a, 8b, 8c and 8d.

Minimum Monthly Charge
The minimum charge shall be the higher of the following:

1. The distribution monthly grid access charge.
2. The contract minimum in accordance with the Cooperative’s line extension policy.

Determination of Billing Demand (Non-coincident peak demand)
The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

Power Factor Adjustment
The member agrees to maintain a power factor of not less than 90%, and the Cooperative reserves the right to measure such power factor at any time. Should such measurements indicate that the power factor of the member is less than 90%, the member agrees, upon sixty days’ written notice, to correct such power factor to 90%, or if the Cooperative shall so elect, an adjustment is made by taking the demand recorded by the meter, multiplied by 90%, and divided by the percent power factor, then subtracting the recorded demand and multiplying that result by the demand rate.

Conditions of Service
In those cases where it is necessary to extend or reinforce distribution lines, service will be furnished only under the following conditions:

1. The member shall give satisfactory assurance supported by a written agreement for a period of not less than five years.
2. Motors having a rated capacity in excess of ten horsepower must be three-phase.
3. All wiring, pole lines, wires, and other electrical equipment beyond the service point will be considered the distribution system of the members and shall be furnished and maintained by the member.
4. Capacitors are required on motors of 20 horsepower or greater.
COMMERCIAL, PUBLIC BUILDINGS & SMALL POWER SERVICE
Schedule B - Code 061, 062, 063, 401, 402, 403, 601, 602, 603

Applicable
Throughout the Cooperative’s service area, subject to the Cooperative’s Rules and Regulations of Service and the Rules of the Wyoming Public Service Commission.

Available
To small commercial enterprises, public buildings, and three-phase farm members having an installed transformer capacity of 37.5 kVA or less. Each metering point shall be billed separately under the appropriate rate.

Type of Service
Single-phase, and three-phase where available, 60 hertz, at available secondary voltage.

Should such measurements indicate that the power factor of the member is less than 90%, the member agrees, upon sixty days' written notice, to correct such power factor to 90%, or if the Cooperative shall so elect, an adjustment is made by taking the demand recorded by the meter, multiplied by 90%, and divided by the percent power factor, then subtracting the recorded demand and multiplying that result by the demand rate.
TIME-OF-DAY – COMMERCIAL
Schedule C – T-O-D Code 131, 132, 133

Applicable
Throughout the Cooperative’s service area, subject to the Cooperative’s Rules and Regulations of Service and Rules of the Wyoming Public Service Commission.

Available
To small commercial enterprises having an installed transformer capacity of 37.5 kVA or less. Each metering point shall be billed separately under the appropriate rate.

Type of Service
Single-phase, 60 hertz, at available secondary voltage.

Monthly Rate

Local Distribution Service
- Grid Access Charge: $70 / month
- On-Peak Delivery Charge: $0.03000 / kWh (3:00 p.m. to 10:00 p.m.)
- Off-Peak Delivery Charge: $0 / kWh (All other hours)
- Peak Capacity Charge: $0 / NCP kW

Transmission Service
- On-Peak Delivery Charge: $0.03904 / kWh (3:00 p.m. to 10:00 p.m.)
- Off-Peak Delivery Charge: $0 / kWh (All other hours)
- Peak Capacity charge: $0 / NCP kW

Power Generation Service
- On-Peak Energy Production Charge: $0.11892 / kWh (3:00 p.m. to 10:00 p.m.)
- Off-Peak Energy Production Charge: $0.04582 / kWh (All other hours)
- Peak Capacity Charge: $0 / NCP kW

Bundled kWh and kW rates (for informational purposes only)
- All On-Peak kWhs: $0.18796 / kWh (3:00 p.m. to 10:00 p.m.)
- All Off-Peak kWhs: $0.04582 / kWh All other hours
- Peak kW: $0 / NCP kW

Tariff Rate Rider
This rate schedule is subject to the Tariff Rate Rider set forth on Sheet Nos. 8, 8a, 8b, 8c and 8d.

Minimum Monthly Charge
The minimum charge shall be the higher of the following:
1. The distribution monthly grid access charge.
2. The contract minimum in accordance with the Cooperative’s line extension policy.
Determination of Billing Demand (Non-coincident peak demand)
The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

Power Factor Adjustment
The member agrees to maintain a power factor of not less than 90%, and the Cooperative reserves the right to measure such power factor at any time. Should such measurements indicate that the power factor of the member is less than 90%, the member agrees, upon sixty days' written notice, to correct such power factor to 90%, or if the Cooperative shall so elect, an adjustment is made by taking the demand recorded by the meter, multiplied by 90%, and divided by the percent power factor, then subtracting the recorded demand and multiplying that result by the demand rate.

LARGE POWER SERVICE
Schedule LP – Code 081, 082, 083, 091, 092, 093, 421, 422, 423, 501, 502, 503, 521, 522, 523, 541, 542, 543

Applicable
Throughout the Cooperative's service area, subject to the Cooperative’s Rules and Regulations of Service and the Rules of the Wyoming Public Service Commission.

Available
To all members located adjacent to the Cooperative’s three-phase lines for all types of usage having an installed transformer capacity in excess of 37.5 kVA, except irrigation.

Type of Service
Single-phase, and three-phase where available, 60 hertz, at available secondary or primary voltage.

Monthly Rate

Local Distribution Service
- Grid Access Charge $110 / month
- Delivery Charge $0.01218 / kWh
- Peak Capacity Charge $5.26 / NCP kW

Transmission Service
- Delivery Charge $0 / kWh
- Peak Capacity Charge $6.11 / NCP kW

Power Generation Service
- Energy Production Charge $0.04582 / kWh
- Peak Capacity Charge $6.63 / NCP kW

Bundled kWh and kW rates (for informational purposes only)
- All kWh $0.058 / kWh
- Peak kW $18 / NCP kW

Tariff Rate Rider
This rate schedule is subject to the Tariff Rate Rider set forth on Sheet Nos. 8, 8a, 8b, 8c and 8d.

Minimum Monthly Charge
The minimum charge shall be the highest of the following:

1. The minimum charge specified in the contract for service.
2. The distribution monthly grid access charge of $0.75 per kVA of installed transformer capacity.
3. The distribution monthly grid access charge.

Large Power Service (continued)

Determination of Billing Demand (non-coincident peak demand)
The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

Power Factor Adjustment
The member agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted for members with 50 kW or more of measured demand to correct for average power factor lower than 95% and may be so adjusted for members if and when the Cooperative deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the average power factor is less than 95% lagging.

Primary Service
A. Demand charge only will be reduced by three percent when the member owns and maintains transformation facilities, and metering is on the low side (Rate Code 521, 522, 523).
B. Demand charge will be reduced by three percent and energy by two percent when the member owns and maintains transformation facilities and metering is on the high side (Rate Codes 541, 542, 543).
RIDER FOR STANDBY SERVICE

APPLICATION

The Rider for Standby Service is required under the following provisions for any member needing scheduled maintenance service or unscheduled outage service who is receiving electric service under one of the Cooperative’s firm retail electric rate schedules and who has entered into a contract with the Cooperative for the interconnection and operation of an on-site extended parallel distributed generation system:

1. Contracts will be made for this service provided the Cooperative has sufficient capacity available in transmission and distribution facilities to provide such service at the location where the service is requested.

2. Power production equipment (distributed generation system) at the member’s site shall not operate in parallel with the Cooperative’s system until the installation has been inspected by an authorized Cooperative representative and final written approval is received from the Cooperative to commence parallel operation.

3. The minimum term of service taken under this Rider shall be one (1) year or such longer period as may be required under an Electric Service Agreement. Following the initial one-year period, a member receiving standby service may terminate standby service and establish service under a firm service tariff schedule within the same time frame as would be required of a new member with a similar firm service load. Such time frame may be dependent on the Cooperative’s Power Supplier’s ability to adjust its generation capability, including reserve margin, for the increased firm load due to the member’s selection of firm service from the Cooperative.

4. Energy provided to the member under this Rider is limited to energy used during a forced outage or planned maintenance of the member’s distributed generation system.

Exceptions to this Application include:

A. Any member taking service under the Cooperative’s Net Metering Service Schedule as established under Wyoming Statute Ann 37-16-301 to 304 shall not be required to take service under this Rider for standby services required to temporarily back up distributed generation systems rated at 25 kW or less;

B. Any member taking service under the Cooperative’s Rider for Distributed Generation Service shall not be required to take service under this Rider for standby services required to temporarily back up distributed generation systems rated at 60 kW or less. However, the Cooperative reserves the right to limit the number of Distributed Generation members receiving such an exception based on financial considerations; or

C. Any member, in lieu of service under this Rider, may provide physical assurance to ensure that standby service is not taken. A member requesting physical assurance shall agree to furnish and install an approved load limiting device which shall be set and sealed by the Cooperative so that the member’s use of service will not exceed the member’s contracted demand. The installed cost of the load limiting device shall be paid by the member.
DEFINITIONS

Contracted Standby Demand is the quantity specified in the member's Electric Service Agreement as the maximum amount of firm or non-firm standby service the Cooperative is obligated to supply.

Extended Parallel means the distributed generation system is designed to remain connected with the Cooperative's distribution system for an extended period of time. The Cooperative's distribution system and the members' distributed generation system will normally be isolated from each other by use of a normally open switch.

Firm Service refers to a Cooperative's most reliable, constant electric service. A Cooperative would interrupt the supply of electricity to a firm-service member only as a last resort.

Non-Firm Service refers to electric service that a Cooperative provides only to the extent that it has capacity not being used to meet the needs of firm-service members at the moment.

Scheduled Maintenance service is energy, or energy and capacity, supplied by the Cooperative during scheduled maintenance of the member's non-Cooperative source of electric energy supply (distributed generation system).

Unscheduled Outage service is energy, or energy and capacity, supplied by the Cooperative during unscheduled outages of the member's non-Cooperative source of electric energy supply (distributed generation system).

MONTHLY RATE

The following Reservation and Usage Fees are applicable in addition to all charges for service being taken under the Cooperative's base rate schedule:

Reservation Fees

Charges as specified below for the reservation of either Firm or Non-Firm generation, transmission and distribution service per Month per kW will each be applied to the member's Contracted Standby Demand as specified in the member's Electric Service Agreement with the Cooperative:

<table>
<thead>
<tr>
<th>Firm Service</th>
<th>Non-Firm Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>($ per kW)</td>
<td>($ per kW)</td>
</tr>
<tr>
<td>Generation</td>
<td>*</td>
</tr>
<tr>
<td>Transmission</td>
<td>*</td>
</tr>
<tr>
<td>Distribution</td>
<td>$5.20</td>
</tr>
</tbody>
</table>

* Firm Standby Service generation and transmission Reservation Fees will be billed under the rates, terms and conditions of the Cooperative's wholesale power supplier.

** Non-Firm Standby Service generation and transmission Reservation Fees will be billed under the rates, terms and conditions of the Cooperative's wholesale power supplier.

Usage Fees

Demand Charge

Date Issued: August 29, 2017
By: Brian Heithoff
If a member registers electrical usage from the Cooperative during a billing month, then such usage may result in demand charges, which may vary between the members contracting for Firm Standby Service or Non-Firm Standby Service.

If usage of a firm standby, the member results in wholesale capacity charges to the Cooperative, then the metered demand of such usage will be charged at the demand rate as contained in the base tariff to which this Rider is attached minus the applicable Reservation Fees paid by the member during such billing month. The reduction in the base tariff billing demand will be provided up to the amount of Contracted Standby Demand. Any metered demand for the member's electrical usage from the Cooperative that exceeds the Contracted Standby Demand will be billed at the full demand rate specified in the base tariff. In addition, the member's Contracted Standby Demand will be adjusted as specified in the Billing Demand clause of this Rider. If the member registers electrical usage from the Cooperative during a billing month that also coincides with the Cooperative's wholesale power supplier's applicable billing peak, then additional demand charges may be applied by the Cooperative to ensure that the member fully compensates the Cooperative for such wholesale power costs.

Power may not be available when needed for a non-firm standby member. If power is available and usage of a non-firm standby member results in wholesale capacity charges to the Cooperative, then if by the metered demand of such usage will be charged at no less than the demand rate as contained in the base tariff to which this Rider is attached minus the applicable Reservation Fees paid by the member during such billing month. (Any higher demand charges for non-firm demand use will reflect higher wholesale demand costs incurred to provide such service.) The reduction in the base tariff billing demand will be provided up to the amount of Contracted Standby Demand. Any metered demand for member electrical usage from the Cooperative that exceeds the Contracted Standby Demand level will be billed at the full demand rate specified in the base tariff. In addition, the member's Contracted Standby Demand will be adjusted as specified in the Billing Demand clause of this Rider. If the member registers electrical usage from the Cooperative during a billing month that also coincides with the Cooperative's wholesale power supplier's applicable billing peak, then additional demand charges may be applied by the Cooperative to ensure that the member fully compensates the Cooperative for such wholesale power costs.

Energy Charge

Energy actually used by a firm standby member under this Rider will be charged at the same energy rate as contained in the base tariff to which this Rider is attached.

If energy is available for a non-firm standby member, then energy actually used under this Rider will be charged at no less than the energy rate contained in the base tariff to which this Rider is attached. Any higher energy charges for non-firm energy use will reflect higher wholesale energy costs incurred to provide such energy.

Rate Adjustments

Bills shall be subject to all adjustments applicable to the base schedule to which this Rider is attached.
THE PUBLIC SERVICE COMMISSION OF WYOMING

NAME: High West Energy, Inc.
ADDRESS: P.O. Box 519
Pine Bluffs, WY 82082

Wyo. P.S.C. Tariff No. 4
Original Sheet No. 8c
Cancels __Sheet No._

BILLING DEMAND

The member shall contract for a specific kilowatt demand of standby service sufficient to meet the member's requirements when the distributed generation system is not being operated. In the event the Contracted Standby Demand is exceeded in any month by a higher billing demand, such higher demand shall be considered as the new billing demand for the month. The billing demand for Reservation Fees thereafter shall be not be less than the newly established billing demand for the remainder of the contract. Such adjustment of billing demand applicable to Reservation Fees will recognize circumstances where on-going firm service is being provided in addition to standby service.

STRANDED INVESTMENT

Any member who installs load limiting equipment to ensure that standby service is not taken (physical assurance) and does not intend to deliver power into the distribution system will have the option of making a lump sum payment to the Cooperative for stranded distribution investment. If such lump sum payment is not made, then the member will be subject to distribution standby charges based on the member's typical demands incurred prior to requesting physical assurance status.

BILLING AND TERMS OF PAYMENT

Billing and terms of payment shall be governed as set forth in the Cooperative's applicable base rate schedule.

TERMS AND CONDITIONS OF SERVICE

1. The member shall execute an Electric Service Agreement with the Cooperative which shall specify:
   a. Standard rate schedule (to which this Rider is attached);
   b. Contracted Standby Demand;
   c. Generator Nameplate Rating, and
   d. Type of Standby Service (firm or non-firm).

2. The Cooperative will install all metering equipment necessary to monitor services provided to ensure adequate measurements are obtained to support necessary application of charges.

3. The member shall make provision for on-site metering. All energy received from and delivered to the Cooperative shall be separately metered. The Cooperative may require metering of the generation output.

4. The member shall pay for all interconnection costs incurred by the Cooperative made necessary by the installation of the distributed generation system.

5. The Cooperative reserves the right to discontinue the member's generator from its system if the generator interferes with the operation of the Cooperative's equipment or with the equipment of other Cooperative members.

6. The Cooperative shall not be obligated to supply standby service for a member's load in excess of the capacity for which the member has contracted.

7. The member shall be liable for all damages or costs caused by the member's use of power in excess of contracted for capacity.

Date Issued: August 29, 2017
By: Brian Heithoff

EFFECTIVE:

STATE OF WYOMING
8. The Cooperative may require the member to furnish and install an approved load limiting device which shall be set and sealed by the Cooperative so that the member's use of service will not exceed the number of kilowatts contracted for by the member.

9. The member shall annually furnish documentation to the Cooperative confirming the maximum capacity and reliability of the power source for which the member requires Standby Service.

10. The Cooperative and the member will coordinate the planning and determining of a schedule for performance of periodic maintenance of the member's facilities. Such maintenance shall be scheduled to avoid wholesale power billing costs or as agreed upon in the contract. The Cooperative will require the member to provide reasonable notice of its proposed schedule for maintenance. The duration of the agreed maintenance schedule may thereafter be extended only with the consent of the Cooperative in response to the member's request received prior to the end of the maintenance period.

11. The Cooperative reserves the right to establish a minimum charge in order to recover the costs of facilities required to serve such load. Said charge shall be specified in the Electric Service Agreement.

12. The Cooperative may be reimbursed by the member for costs which are incurred, or which have been previously incurred, in providing facilities which are used principally or exclusively in supplying service for any portion of the member's requirements which are to be normally supplied from a source of power other than the Cooperative's electric system.

13. All electricity delivered shall be for the exclusive use of the member and shall not be resold.

14. The member shall indemnify the Cooperative against all liability which may result from any and all claims for damages to property and injury or death to persons which may arise out of or be caused by the erection, maintenance, presence, or operation of the co-generation facility or by any related act or omission of the member, its employees, agents, contractors or subcontractors.

Tariff Rate Rider
This rate schedule is subject to the Tariff Rate Rider set forth on Sheet Nos. 8, 8a, 8b, 8c and 8d.

Condition of Service
1. For new installations, a member is required to take service for at least 12 months.
2. Installations include one service pole and one span of secondary. Additional costs beyond this basic service shall be borne by the member.
3. The above rate includes luminaire light fixtures and suitable controls.
Available
Service under this schedule is available to the United States Air Force in accordance with contracts F4 8608-70-C-0155 and any appendices or revisions.

Monthly Rate

Local Distribution Service
   Grid Access Charge $110 / month
   Delivery Charge $0.02120 / kWh
   Peak Capacity Charge $5.20 / NCP kW

Transmission Service
   Delivery Charge $0.00928 / kWh
   Peak Capacity charge $6.14 / NCP kW

Power Generation Service
   Energy Production Charge $0.04582 / kWh
   Peak Capacity Charge $6.66 / NCP kW

Bundled kWh and kW rates (for informational purposes only)
   All kWh $0.07630 / kWh
   Peak kW $18 / NCP kW

Tariff Rate Rider
This rate schedule is subject to the Tariff Rate Rider set forth on Sheet Nos. 8, 8a, 8b, 8c and 8d.

Minimum Bill
$4,987/month.

Determination of Billing Demand (non-coincident peak demand)
The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

Power Factor Adjustment
The member agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted for members with 50 kW or more of measured demand to correct for average power factor lower than 95% and may be so adjusted for members if and when the Cooperative deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the average power factor is less than 95% lagging.
CO-GENERATION SERVICE
Schedule XP-G

Applicable
Throughout the Cooperative's service area, subject to the Cooperative's Rules and Regulations of Service and the Rules of the Wyoming Public Service Commission.

Available
To all members who install and operate qualifying facilities for generating electric energy.

Type of Service
Single-phase or three-phase generation, 60 hertz, at available secondary voltage.

Monthly Rate
All kWh put into the Cooperative system to be paid for at the Cooperative's power supplier's avoided cost, which is currently $0.029 per kWh.

Conditions of Service
1. Maximum capacity of unit – 25 kW.
2. The member shall purchase all auxiliary equipment and the meter necessary for metering energy put into the Cooperative's system.
3. The Cooperative shall test and maintain the additional meter.
4. The member shall provide and install all necessary safety equipment for clearing faults and for prevention of energization of the Cooperative's system during outages, whether planned or accidental.
5. The member shall cause the generating equipment to be so equipped that it will not generate into the Cooperative's system when the facility is not up to frequency (60 hertz).
<table>
<thead>
<tr>
<th>NET METERING SERVICE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Schedule N</td>
</tr>
</tbody>
</table>

**Applicable**
Throughout the Cooperative's service area, subject to the Cooperative's Rules and Regulations of Service and the Rules of the Wyoming Public Service Commission.

To members who install and use facilities primarily to offset part or all of the member-generator's requirements for electricity by using solar, wind, biomass, or hydropower. The production of electrical energy is located on the member-generator's premises. Service under this schedule is limited to a maximum capacity of 25 kW. This schedule is offered in compliance with Wyoming Statute Ann §§37-16-101 to 104.

**Available**
To member's receiving service under any of the Cooperative's rate schedules.

**Types of Service**
Single-phase, 60 hertz, at available secondary voltage.

**Monthly Rate**
The monthly billing from the Cooperative shall be in accordance with the applicable rate schedule for the type of service rendered.

**Generation Credit**
The Cooperative shall pay for all energy generated in excess of the member's usage at the effective avoided energy cost.
NET METERING SERVICE (continued)

Special Conditions

1. If the electricity supplied by the Cooperative exceeds the electricity generated by the member-generator, the price specified in the Energy Charge section of the Monthly Rate of the applicable standard service tariff shall be applied to the positive balance owed to the Cooperative.

2. If the electricity supplied by the member-generator exceeds that supplied by the Cooperative, the member will be billed for the appropriate monthly charges and shall be credited for such net energy with the kilowatt-hour credit appearing on the bill for the following month.

3. At the beginning of each calendar year, any remaining unused kilowatt-hour credit accumulated during the previous year shall be sold to the Cooperative at the average avoided energy cost for the applicable calendar year.

4. A net metering facility shall meet all applicable safety and performance standards established by the National Electrical Code, the Institute of Electrical and Electronics Engineers and Underwriters Laboratories.

5. The member-generator shall at its expense, provide lockable switching equipment capable of isolating the net metering facility from the Cooperative's system. Such equipment shall be approved by the Cooperative, and shall be accessible by the Cooperative at all times.

6. The Cooperative shall not be liable directly or indirectly for permitting or continuing to allow an attachment of a net metering facility or for the acts or omission of the member-generator that cause loss or injury, including death, to any third party.
GRANDFATHERED TIME-OF-DAY
LARGE POWER SERVICE
Schedule LP – T-O-D Code 151, 152, 153

Applicable
To existing accounts on this schedule as of June 1, 2019, subject to the Cooperative’s Rules and Regulations of Service and the Rules of the Wyoming Public Service Commission. No new accounts allowed as of June 1, 2019.

Available
To all members located adjacent to the Cooperative’s three-phase line for all types of usage, having an installed transformer capacity in excess of 37.5 kVa, except irrigation.

Type of Service
Three-phase or single-phase, 60 hertz, at available secondary or primary voltage.

Monthly Rate

LARGE POWER SERVICE (continued)

Minimum Monthly Charge
The minimum charge shall be the highest of the following:
1. The minimum charge specified in the contract for service.
2. A charge of $0.75 per kVA of installed transformer capacity.
3. The distribution monthly grid access charge.

Determination of Billing Demand (coincident peak demand)
The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes (between 12:00 p.m. and 10:00 p.m.) during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

Power Factor Adjustment
The member agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted for members with 50 kW or more of measured demand to correct for average power factor lower than 95% and may be so adjusted for members if and when the Cooperative deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the average power factor is less than 95% lagging.

Conditions of Service
1. The Cooperative will read the meters on a monthly basis.
2. The member, prior to being signed up on this service tariff, will be required to be current with their billing.
3. The service contract may be cancelled by agreement of both parties. If the contract is cancelled, the member is no longer qualified to receive service under this service tariff at that location for twelve months.

**Tariff Rate Rider**
This rate schedule is subject to the Tariff Rate Rider set forth on Sheet Nos. 8, 8a, 8b, 8c and 8d.
NEW TIME-OF-DAY
LARGE POWER SERVICE (continued)

Minimum Monthly Charge
The minimum charge shall be the highest of the following:
1. The minimum charge specified in the contract for service.
2. A charge of $0.75 per kVA of installed transformer capacity.
3. The distribution monthly grid access charge.

Determination of Billing Demand (coincident peak demand)
The coincident peak (CP) billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes (between 12:00 p.m. and 10:00 p.m.) during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

The non-coincident peak (NCP) shall be the maximum kilowatt demand established by the member for any fifteen consecutive minutes during the month for which the bill is rendered as indicated or recorded by a demand meter and adjusted for power factor as follows:

Power Factor Adjustment
The member agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted for members with 50 kW or more of measured demand to correct for average power factor lower than 95% and may be so adjusted for members if and when the Cooperative deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the average power factor is less than 95% lagging.

Conditions of Service
4. The Cooperative will read the meters on a monthly basis.
5. The member, prior to being signed up on this service tariff, will be required to be current with their billing.
6. The service contract may be cancelled by agreement of both parties. If the contract is cancelled, the member is no longer qualified to receive service under this service tariff at that location for twelve months.

Submetered Water Heating Rate
Schedule A – Water Heating Code 191, 192, 193

Applicable
Throughout the Cooperative’s service area where a member has installed Cooperative approved storage water heating equipment, subject to the Cooperatives Rules and Regulations of Service and the Rules of the Wyoming Public Service Commission.

Available
To all members for farm, commercial and domestic uses as long as the water heating equipment is wired for load control and separately metered by the Cooperative.

Type of Service
Single-phase, 60 hertz, at available secondary voltage.

Monthly Rate

Local Distribution Service
- Grid Access Charge $10 / month
- Delivery Charge $0.00917 / kWh
- Peak Capacity Charge $0 / NCP kW

Transmission Service
- Delivery Charge $0 / kWh
- Peak Capacity Charge $0 / NCP kW

Power Generation Service
- Energy Production Charge $0.04582 / kWh
- Peak Capacity Charge $0 / NCP kW

Bundled kWh and kW rates (for informational purposes only)
- All kWhs $0.05499 / kWh
- Peak kW $0 / NCP kW

Conditions of Service
1. The member, prior to being signed up on this service tariff, will be required to be current with their billing.
2. The service contract may be cancelled by agreement of both parties. If the contract is cancelled, the member is no longer qualified to receive service under this service tariff at that location for twelve months.
3. The member will be required to install Cooperative approved storage water heating equipment.
4. The member shall agree not to hold the Cooperative liable for any loss resulting from the interruption of the electric water heating services.
5. Service will be submetered.
6. Service will not be available during the peak times of 3:00 p.m. to 10:00 p.m. daily, except Sundays.

**Determination of Billing Demand (non-coincident peak demand)**
The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes (between 3:00 p.m. and 10:00 p.m.) during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

**Power Factor Adjustment**
The member agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted for members with 50 kW or more of measured demand to correct for average power factor lower than 95% and may be so adjusted for members if and when the Cooperative deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the average power factor is less than 95% lagging.

SURGE PROTECTION RIDER
Rider #1 – Code 211, 212, 213

Type of Service
Single-phase services for Residential, Farm and Small Commercial accounts through one meter at available secondary voltages. The Cooperative will guarantee up to $5,000 worth of equipment damages on any single piece, up to $25,000 per failure. The Cooperative’s guarantee does not apply to direct strikes by lighting on the premises.

Location

<table>
<thead>

</tr>
</tbody>
</table>

Current Applicable Requirements:

1. A minimum commitment of two years is expected to receive over-voltage protection via this rider. If the two-year term is not fulfilled, the Cooperative retains the right to bill the monthly service charges for the remainder of that month, along with a $50 fee for removing any over-voltage power quality equipment.
2. The over-voltage equipment will protect against an electrical transient or spike on the AC power including those caused by indirect lightning which is typically considered off-premises lighting.
3. The over-voltage power quality equipment will be located at either the meter and/or the panel, mutually agreed upon by the Cooperative and the member. In addition to the package installed by the Cooperative, member may install additional surge strips for other appliances.
4. The Cooperative will comply with acceptable standards for connection, safety, and operating reliability.
5. The Cooperative may regularly inspect, maintain, and service the facility for safe and reliable operation and maintain a record or log, available for inspection, showing when the facility is shut down for repairs or maintenance, the maintenance or repair completed, and when the facility is placed back in service.
6. The member shall permit Cooperative representatives to enter upon member’s property at any reasonable time for the purpose of inspecting or testing the equipment, facilities or apparatus and the dependability of the Cooperative’s equipment.
7. The Cooperative does not guarantee the reliability of the power supply due to major ice, lightning storms, or director lightning hits.
8. The Cooperative is not responsible for human injury or death if such an event should happen during a period where equipment covered by this tariff is installed.
9. The Cooperative will advise members on code related violations of electrical system grounding. Updates may be at the Members expense.

**Determination of Billing Demand (Non-coincident peak demand)**

The billing demand shall be the maximum kilowatt demand established by the member for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter.

---

**Conditions of Service**

1. The Cooperative will read the meters monthly.
2. If the service tariff is cancelled, the member is no longer qualified to receive service under this tariff at that location for twelve months. The member will be responsible for purchasing the water heater per the applicable buyout fee or agree to have it removed at their cost and returned to the Cooperative.
3. The member, prior to being signed up on this service tariff, will be required to be current with their billing.
4. The member will be required to install Cooperative-approved and owned storage water heating equipment.
5. Heating will not normally be available during the peak times of 3:00 p.m. to 10:00 p.m. daily, except Sundays, although override capabilities will be provided to the member. The Cooperative reserves the right to change the control hours. The total number of heating hours per day will not be less than 12.
6. The member shall agree not to hold the Cooperative liable for any loss resulting from the interruption of the electric water heating services.
7. Whether or not the owner of the property is a member-generator of electric energy under any state law, all energy and associated charges consumed by devices, equipment or appliance installed and owned by the Cooperative, or its affiliated organizations, will be purchased from the Cooperative.
8. The member may be charged, with prior approval, for any items outside the scope of this service. For example: breakers, new panels, extra wiring, etc.
9. The water heater and the load control device are the property of the Cooperative.

RULES AND REGULATIONS OF SERVICE

GENERAL SOURCES OF AUTHORITY

b. Wyoming laws and Rules of the Wyoming Public Service Commission pertaining to electrical service utilities.

c. Rules, regulations and minimum standards established and adopted by Federal and State Regulatory Agencies governing and regulating the operations of electric service utilities.

PURPOSE OF RULES AND REGULATIONS OF SERVICE

These Rules and Regulations of Service shall govern the supplying and taking of electric service in such manner as will secure for each member the greatest practicable latitude in the enjoyment of service that is consistent in practice and approach comparable to other utilities in the industry, safe to members and the Cooperative. These Rules and Regulations supersede and cancel all previous regulations pertaining to the supplying and taking of the Cooperative's electric service.

APPLICATION OF RULES AND REGULATIONS OF SERVICE

These Rules and Regulations of Service, and any modifications thereof and additions thereto lawfully made, are applicable to all members receiving electric service within the State of Wyoming, and where applicable in other states, from the Cooperative, and to all standard service agreements and contracts now existing or which may be entered into by the Cooperative, and to all rate schedules, which from time to time may be lawfully established.

The Cooperative may decline to serve a member or prospective member until such member or prospective member has complied with the rules and regulations of the Cooperative.

APPLICATION OF RULES AND REGULATIONS OF SERVICE - continued

The Cooperative may refuse or discontinue service to any member for non-compliance with these Rules and Regulations of Service where they specifically so provide.

MODIFICATION OF RULES AND REGULATIONS OF SERVICE

No agent, representative or employee of the Cooperative shall have authority to modify these Rules and Regulations of Service, but the Cooperative shall have the right to amend these Rules and Regulations of Service or to make additional Rules and Regulations of Service as it may deem necessary from time to time, subject to the approval of the Board of Directors and the Commission.

DEFINITIONS

The following expressions when used in these Rules and Regulations of Service, in Rate Schedules, and in Service Agreements shall, unless otherwise indicated, have the meanings given below:

Applicant: Any person, firm, corporation or public body requesting electric service from the Cooperative.

Membership: Wyoming Public Service Commission

Electricity: Electric power and energy produced, transmitted, distributed or furnished by the Cooperative.

Member: Any person, firm, corporation, or public body who has complied with the requirements for membership as provided in the Cooperative's Rules and Regulations of Service, and has been accepted by the Cooperative's Board of Directors, and is being or will be supplied electric service by the Cooperative.

Meter: Any device or devices used to measure or register electric power and energy.

AVAILABILITY AND TYPE OF ELECTRIC SERVICE:

The type of electric service which will be furnished to the member will depend on the location, size, and type of load to be served.

It is necessary that the member obtain from the Cooperative the phase and voltage of the service that will be furnished before proceeding with the purchase of motors or other equipment.

Also, the point of delivery on the premises served must be determined before the member’s wiring installation is made.

The Cooperative renders 60 hertz (Hz) service from circuits of the following characteristics:

<table>
<thead>
<tr>
<th>Nominal System Voltage</th>
<th>Safe Operating Limits</th>
<th>Type of System</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. 120-volts</td>
<td>114 to 126 volts</td>
<td>Single-phase, 2 wire</td>
</tr>
<tr>
<td>B. 120/240-volts</td>
<td>228 to 252 volts</td>
<td>Single-phase, 3 wire</td>
</tr>
<tr>
<td>C. 208Y/120-volts</td>
<td>197 to 218 volts</td>
<td>Three-phase, 4 wire wye</td>
</tr>
<tr>
<td>D. 240/120-volts</td>
<td>228 to 252 volts</td>
<td>Three-phase, 4 wire Delta</td>
</tr>
<tr>
<td>E. 480/240-volts</td>
<td>456 to 504 volts</td>
<td>Three-phase, 4 wire Delta</td>
</tr>
<tr>
<td>F. 480Y/277-volts</td>
<td>456 to 504 volts</td>
<td>Three-phase, 4 wire wye</td>

<tr>
<td>G. 12,470Y/7200-volts</td>
<td>11,846 to 13,094 volts</td>
<td>Three-phase, 4 wire wye</td>
</tr>
</tbody>
</table>

The preceding voltages are standard types of service supplied by the Cooperative, where available, and when all contract terms and terms and conditions for service have been agreed to by the member and the Cooperative.

Deviation from the nominal service voltages of the Cooperative shall be in accord with the voltage levels as listed in the American National Standards Institute (ANSI) 84.1.

Special service voltages will not be supplied to a member by the Cooperative. Special voltage is a voltage requested by the member which is different from the standard service voltages supplied by the Cooperative.

RATES

APPLICATION OF RATES

The Cooperative's published rate schedules state the conditions under which each rate schedule is available
for electric service. A member may take electric service at one location (premises) under more than one rate
schedule if separately metered, unless the rate schedule specifically provides otherwise.

The Cooperative will determine for any member the rate best suited for existing or anticipated
service requirements as defined by the member. When optional rates are available to the
member, it is the member's obligation to designate a choice.

Rates are normally established on a twelve-month basis, and a member having accepted a rate
suited for the member's service requirements may not change to another rate within a twelve-month period
unless there is a substantial change in the character or conditions of the member's service.

Where a written agreement (contract) for electric service has been executed by the Cooperative
and the member for a specified period of time, longer than sixty (60) months, the rate schedule
specified in the agreement shall apply during the contracted term, unless, there is a substantial
change in the character of the member's operating conditions. In such case, the cost to provide
electric service, actual revenue received, and other related information will be reviewed to
determine if justification exists to change to a more favorable rate for the member under the
remaining contract term.

Special rates shall not be available to a member or non-member, or become effective for use by the
Cooperative until approved by the Board of Directors and filed with the Wyoming Public Service Commission.

A copy of every tariff and rate schedule under which electric service is being furnished to
members by the Cooperative shall be available to the public upon request at the Cooperative's
local office.

No jurisdictional rate or tariff shall be instituted, added, deleted, changed, closed or discontinued,
except pursuant to Order of the Commission upon application.

STATE OF WYOMING
TEMPORARY AND INDETERMINATE SERVICE RATES

A member requiring temporary and indeterminate service shall pay the regular rates applicable to the class or classes of service rendered.

Temporary service is defined as service for purposes which by their very nature indicate short duration, one (1) year or less.
APPLICATION FOR SERVICE

Any person, firm, corporation, or public body desiring to apply for electric service may do so by:

1. Signing an application for membership and electric service.
2. Paying the membership fee specified by the Cooperative and any applicable deposit.

A single application for service may not be made to apply to different locations, or to cover more than one meter at the same location to be used by the same member, unless the Cooperative determines that the physical or electrical characteristics of the facility served requires more than one point of delivery according to good engineering and operating practice.

Every application shall be made in the true name of the applicant desiring and using service. In case of violation of this provision, the Cooperative may discontinue service.

The contract for service is not transferable by the member, and a new occupant of the premises must make a new and separate application in writing to the office of the Cooperative before service is begun.

A member no longer desiring service at a location must notify the Cooperative of his intent to discontinue service in order to avoid liability for payment for subsequent service at such location.

The Cooperative will assess a short-service fee if the same member or person wishes to reconnect the service. (Fee is listed on R59).

Any person who uses electric service of the Cooperative but fails to make application for such service shall be liable to the Cooperative for payment therefor under the applicable rate schedule.

- continued -
APPLICATION FOR SERVICE - continued

Unless otherwise specified, all contracts for electric service under the scheduled rates of the Cooperative shall be for an initial period of five (5) years, and are automatically renewed upon the expiration date on a month to month basis unless canceled by either party.

The Cooperative may require a contract for an extended period of time when a member’s requirements for power or energy are large and necessitate expenditures requiring amortization of the cost of service over an extended period of time in order to justify the investment of the Cooperative.

SERVICE TO NEW INSTALLATION

When making application for service at a location not previously served, the Applicant shall provide to the Cooperative the exact location of the premises and anticipated load characteristics by device. Upon receipt of such information, the Cooperative will designate a Point of Delivery at which service connections will terminate and near which the member must provide, free of expense to the Cooperative, a suitable place, satisfactory to the Cooperative, for the transformer or transformers, meter or meters, or other equipment of the Cooperative, which may be necessary for the fulfillment of such contracts as the member may enter into with the Cooperative.
The Cooperative shall regard each point of delivery as a separate service or contract, and shall separately meter and charge accordingly.

Meter readings shall not be combined for the purpose of giving the member a lower rate.
regardless of his classification except by special contract.

Meters shall not be installed by the member for the purpose of breakdown or sub metering to other members after September 4, 1979.

**CHARGES FOR TAMPERING WITH METER SEALS**

The consumer shall not break, cut or otherwise open the meter seal without prior approval from the Cooperative.

Unauthorized breaking, cutting or otherwise opening a meter seal may subject the consumer to a meter seal charge as described on Sheet No. 58.

DENIAL OF SERVICE TO A MEMBER

The Cooperative may refuse to provide, expand or materially change service to a requesting member when:

1. The Cooperative does not have adequate facilities to render the service requested;

2. The requested service appears to be unsafe or likely to adversely affect service to another member;
   or

3. The requesting member is indebted to the Cooperative for damages to Cooperative property or Cooperative related service charges previously rendered and satisfactory payment arrangements have not been made with the Cooperative.
   a. If indebtedness for service rendered at a former location is in dispute, the requesting member shall be provided service at the new location upon complying with the Cooperation's deposit requirements and paying the amount in dispute. Upon settlement of the disputed amount, any balance due the member shall be refunded with accrued interest at the Commission Authorized Interest Rate, shown on Sheet No. 59.
   b. The Cooperative shall not refuse service to a new member because of debts of a previous member at the same location.
   c. The Cooperative may refuse service due to unpaid line extension charges for facilities serving the location.

MEMBER DEPOSITS

The Cooperative may require a deposit to guarantee payment for each service. This deposit shall not be considered advance payment of bills, but shall be held as security for payment of service rendered. The Cooperative may refuse service to an applicant or discontinue service to a member for failure to comply with this section. The Cooperative shall apply the policies governing member deposits uniformly.

(a) The Cooperative may require a deposit if:

(i) A prior service account with the Cooperative remains unpaid and undisputed at the time of application for service;

(ii) Service from the Cooperative has been terminated for:

   (A) Non-payment of any undisputed delinquent bill;
   (B) Failure to reimburse the Cooperative for damages due to the member’s negligent or intentional acts; or
   (C) Acquisition, diversion or use of service without the authorization of or knowledge by the Cooperative.

(iii) Information provided upon application for service is materially false or a misrepresentation;

(iv) The application is for initial service with the Cooperative or the applicant did not have service with the Cooperative for a period of at least 12 consecutive months.

(v) The applicant or non-residential member is unable to pass the Cooperative’s objective credit screen. In order to pass the objective credit screen, the applicant or non-residential member must fulfill one or a combination of the following:

   (A) Received 12 consecutive months of service from the Cooperative with the undisputed portions of the 12 most recent bills paid in full when due;
   (B) Utilize one of the Cooperative’s auto pay options;
   (C) Provide an acceptable letter of credit or business reference;
   (D) Pass a credit check performed by the Cooperative.

(vi) The request is for service at an address where a former member with an undisputed delinquent bill for service still resides or conducts business;

(vii) The applicant for service or the member has been brought within the jurisdiction of the bankruptcy court or has had a receiver appointed in a state court proceeding within the five-year period immediately preceding the request for service; or

(viii) The Cooperative has determined that it has a significant financial risk in continuing to provide service to a specific load or non-residential member. The Cooperative and member may attempt to reach a deposit agreement. If the Cooperative and member are unable to reach an agreement, the Cooperative shall file a confidential petition requesting expedited review and Commission approval prior to collecting the member deposit. The petition shall contain the basis for the Cooperative’s determination, the amount of deposit sought and sufficient information for the Commission to contact the member.

100475-0065-C-16
STATE OF WYOMING
(b) The Cooperative shall not require a deposit as a condition of new or continued Cooperative service based upon any criterion not specifically authorized by the Rules of the Commission.

c) The required deposit shall not exceed the total amount of the member's estimated bill for three months of highest use based on the premises' monthly bills during the immediate previous 12-month period. If billing information for the immediate previous 12-month period is not available, the deposit shown on the Sheet No. 58 shall apply for residential members. For all other member classes, the deposit will be based on anticipated service characteristics and anticipated load.

(d) The Cooperative shall retain records showing:
   (i) The name and address of each member making the deposit;
   (ii) The date and amount of the deposit; and
   (iii) Each accounting transaction concerning the deposit.

(e) The Cooperative shall provide the member a non-assignable receipt or other record of deposit, showing the date and amount received.

(f) The Cooperative shall calculate simple interest on deposits at the Commission Authorized Interest rate as described on Sheet No. 59. Interest shall apply only to deposits held for at least six months, but shall accrue from the initial date of deposit through the date the deposit is returned to the member.

(g) The Cooperative may accept a written guarantee from an acceptable guarantor in lieu of a deposit to pay a member's bill. After the Cooperative has verified the member's identity, the member shall agree to permit the Cooperative to provide the member's account information to the guarantor upon the member's default.

(h) Deposits and any unpaid interest earned on deposits shall be applied as a credit to the member's bill unless requested by the member to be refunded, when:
   (i) The accrued interest equals or exceeds $10.00. The Cooperative shall apply the credit at least annually;
   (ii) A residential member has received 12 consecutive months of service with no cause to discontinue and the member's bills have been paid when due;
   (iii) A commercial or industrial member has received 12 consecutive months of service, with no cause to discontinue; the member's bills have been paid when due; and the member passes the Cooperative's objective credit screen; or
   (iv) Service is discontinued. The Cooperative shall not require the member to provide the original receipt in order for the deposit to be returned. Any credit balance on the account after the deposit is applied shall be refunded to the member. If the Cooperative is unable to make the refund due to lack of knowledge of the member's location, additional interest will not accrue after the service discontinuation date. The Cooperative shall manage such deposits as unclaimed property as required by Wyoming law (W.S. § 34-24-109).

CHANGE OF OCCUPANCY

When a member elects to discontinue service, the Cooperative is to be notified either by telephone, in person, or in writing, as to the proposed effective date of such discontinuation. The Cooperative will read the meter on the date service is discontinued and may, at its option, discontinue the service. Leaving the service connected to vacant premises does not constitute consent by the Cooperative for the new occupant of such premises to use the service without making proper application for said service.

CONDITIONS OF SERVICE

CONTINUITY OF SERVICE

The Cooperative will use reasonable diligence to supply steady and continuous electric service to each member at the point of delivery, but will not be liable to the member for damages occasioned by irregularities or interruptions beyond the Cooperation's control.

INTERRUPTIONS OF SERVICE

In the event service is interrupted by the Cooperative, other than under emergency conditions, the interruption shall be made at a time which will cause the least reasonable inconvenience to members.

Where possible, all members that will be materially affected, will be notified two business days in advance of such interruptions, as to time and duration with special emphasis placed on notification of hospitals, police, fire, public health and safety installations, etc. The Cooperative shall notify the Commission of all major, planned service Interruptions at least 48 hours in advance, except for emergency interruptions of service. A Major Service Interruption is defined as a single feeder outage to twenty-five (25) or more members for a period estimated to last eight (8) hours or more, or a sustained single feeder outage of two (2) hours or longer to 500 or 50% of members, whichever is fewer.

The Cooperative may cause emergency interruption of service, without notice to the member, when required by failure of equipment, unexpected and prolonged increase in load, fire, storm, strike, act of God, or other causes beyond the Cooperative's control.

The Cooperative may in good faith select the areas or members whose service is interrupted as emergency conditions require.

Each January and July, or as soon as updated information is available, the Cooperative shall submit to the Commission a written, confidential list of the Cooperative's contact names and telephone numbers to be used when a service interruption occurs. The list shall include the contact information of individuals who have knowledge of the service interruption, estimated duration, and possible causes of the service interruption. This list shall also include the contact information of individual(s) who are available to confer with the Commission at any point in time.

PUBLIC SERVICE COMMISSION
APPROVED

EFFECTIVE: AUG 17 2017
STATE OF WYOMING
EXCLUSIVE SERVICE ON COOPERATIVE'S SYSTEM

The standard electric rate schedules of the Cooperative are based on exclusive use of the Cooperative's service, and, except in cases where the member has a contract with the Cooperative for auxiliary, breakdown, or supplementary service, no electric service from another source will be used by the member on the same installation in conjunction with the Cooperative's service.

This does not preclude members from having a net metering system or being a small power producer or qualified facility.

These exclusions do not apply to Net Metering Systems, Qualifying Facilities (QF), or Small Power Producers (SPP).
EMERGENCY GENERATING EQUIPMENT

Exclusive service on the Cooperative's system does not prohibit the installation of emergency generating equipment by members whose services are of such a nature that service interruptions cannot be tolerated, provided that such emergency generating equipment does not operate more than two (2) hours per week under non-emergency conditions.

The emergency generating equipment is not to be connected to the Cooperative's system without the express consent and approval of the Cooperative as to the installation of a double throw switch, the cost of which will be borne by the member.

The emergency generating equipment is not to be connected and operated in parallel with the Cooperative's system at any time.

Auxiliary, breakdown, or supplementary service as furnished by the Cooperative is not to be connected or operated in parallel with a generating plant, except when such operation is provided for by a special contract filed with the Commission.

BILLING

All bills shall be available no later than the 10th calendar day of the month.

The Cooperative may mail to the member at the address shown on the application for service, or change of address order, a bill for electric service delivered thereunder, but the Cooperative reserves the right to adopt other methods of delivering bills.

All bills for electric service are due on the 28th day of the month, after which the bill becomes delinquent.

An estimated reading may be utilized if a reading cannot be obtained or if it is not feasible to read the meter. Estimated meter readings or budget billing shall be clearly identified on the bill. The amount of such an estimated bill will be adjusted as necessary when the next actual reading is obtained.

All bills are to be paid at the office of the Cooperative, or at authorized Cooperative collection points, within the time specified on the bill. Designated collection points require delivery at least one day prior to due date to be considered timely.

When the member requests discontinuance of service, bills for vacating premises, special bills, or removal bills, except bills for non-payment, they shall be processed and billed within thirty (30) days following such request.

Failure to receive a bill in no way exempts the member from payment for electric service.

BILLING INFORMATION

The bill to the member will clearly show the following information:

a. Net amount due and the last day payable after which the bill becomes delinquent;
b. Dates and meter readings of beginning and ending of the period during which service was rendered;
c. A distinct marking to indicate an estimated bill;
d. An appropriate rate or rate code identification;
e. Any multipliers, constants, or factor used in calculating the bill.

- continued -
WAIVER OF MINIMUM MONTHLY PAYMENT

If the Cooperative is prevented from furnishing, or if the member is prevented from receiving all or any considerable portion of the electric service contracted for, and should such failure to deliver or receive be due to acts of God, or to public enemies, strikes, riots, wars, orders of Court, or to other acts reasonably beyond the control of either the Cooperative or the member, the minimum monthly payment provided for shall be waived or adjusted until the situation is resolved.

DELINQUENT BILLS

All bills presented to the member for payment become delinquent if not paid by the 28th day of the month. Payment date is that day the payment is received at the office of the Cooperative. Payments received by mail after the due date will NOT be considered delinquent if postmarked by the 20th. Should the 28th be a Saturday, Sunday, or holiday, the following Monday or workday shall be the delinquent date.

A late payment penalty shown on Sheet No. 59, will be charged to total undisputed past due balance after five business days following the due date.

BUDGET PAY PLAN

Available to members of the Cooperative for farm and home energy payments upon request, after twelve consecutive months of service.

In order to participate in the Cooperative’s budget pay plan, a member must have acceptable payment history with no more than one late payment in the past twelve months. An account must have a zero balance at the time the budget payment plan is established.

Date Issued: August 29, 2017
By: Brian Heithoff
COMPLAINTS AND DISPUTED BILLS

COMPLAINTS

The Cooperative shall perform the following upon notification of a member complaint:

Make a full and prompt investigation;

Advise the member of the findings of the investigation;

Maintain a record of written complaints for three (3) years, including, but not limited to, the following:

a. Name of complainant
b. Address of complainant
c. Date of complaint
d. Character of the complaint
e. Adjustment or disposal made

DISPUTED BILLS

If a member, in writing, disputes a charge for service, discontinuance of service for non-payment of the bill shall be held in abeyance until the dispute is resolved. Upon application of either party, the Commission may make such other orders relating to disputed charges as it deems just.
ADJUSTMENTS OF BILLS

Appropriate adjustment in meter readings and on bills rendered for electric energy may be made under the following circumstances:

1. When meter readings are incorrectly reported.

2. For estimated readings that are later found to vary from the actual usage.

3. When there is a change of residents at a location without the meter being removed or read and there is a question about the final or beginning readings.

4. When there are some other extraordinary circumstances such as extremely bad weather or a disaster that interferes with the normal delivery of mail.

5. If the Cooperative charged, collected, or received any rate or rates in excess of the rates fixed in the Cooperative's tariff, the Cooperative shall immediately refund to the member, the difference between the rates fixed in the tariff and the rates charged, collected or received.

6. If the Cooperative undercharged a member as a result of a meter or metering inaccuracy, or other continuing problem under the Cooperative's control, the Cooperative may bill the member in accordance with Wyo. Stat. § 37-2-222, for the amount of unmetered electricity rendered in the 183 days immediately prior to the date the Cooperative remedies the meter inaccuracy. The typical time period over which the undercharge may be collected shall be 12 consecutive months. The member may elect to pay over a shorter period, or the Cooperative may allow repayment over a longer period.

DISCONTINUATION OF SERVICE

(a) Unless otherwise ordered by the Commission, the Cooperative shall not terminate service to any member for violating the Cooperative’s Rules and Regulations of Service, or for non-payment of bills for service until the Cooperative has given at least seven calendar days’ notice to residential members or three calendar days to commercial or industrial members.

(b) Notice shall be effective when a copy is provided to the member in person, by telephone after member verification, or received by U.S. mail at the member’s last known mailing address.

Additional notice may be provided electronically. The notice shall contain:

(i) The name of the person whose account is delinquent and the service address to be discontinued;
(ii) The rule or regulation that was violated or the amount of the delinquent bill;
(iii) The effective date of the notice and the date on or after which service is to be discontinued;
(iv) The Cooperative’s specific address and telephone number for information regarding how to avoid service discontinuation;
(v) The names of agencies or organizations that have notified the Cooperative that they render assistance to eligible persons who are unable to pay their Cooperative bills; and
(v) A statement advising the member how to contact the Commission if discontinuation is disputed.

(c) For residential members, the notice shall inform the member that, if prior to the initial date for the discontinuation, the member provides the Cooperative with written verification from a health care provider responsible for the care of a member or his/her co-habitants stating that their health or safety would be seriously endangered if service were discontinued, the Cooperative shall extend the date for discontinuation set forth in the notice by 30 days to allow for bill payment.

(d) The Cooperative shall attempt to make actual contact with the member either in person or by telephone, after member verification, before discontinuing service during the cold weather period of November 1 through April 30.

(e) The Cooperative shall also provide notice of discontinuation or account delinquency to a third party if a member or person acting for the member has requested that the Cooperative do so after member identification verification. The right to request third-party notification does not create third-party liability for payment.

(f) If the member defaults, the Cooperative shall provide the discontinuation notice to any guarantor and member simultaneously. The guarantor’s service shall not be subject to discontinuation as a result of the member’s default.

DISCONTINUATION OF SERVICE - continued

(g) The Cooperative shall remove a guarantor when:
   (i) The member has received 12 consecutive months of service with no cause for
discontinuation, bills have been paid when due and the member passes an objective
credit screen;
   (ii) The guarantor has paid all amounts due for service through the date the Cooperative
receives the request to terminate the guarantor agreement; or
   (iii) An additional agreement with the Cooperative is in place.

(h) The Cooperative may discontinue service between 8:00 a.m. and 4:00 p.m., Monday through Thursday,
without further notice when:
   (i) The notification period has elapsed and the delinquent account has not been paid;
   (ii) Acceptable payment arrangements have not been made with the Cooperative;
   (iii) The Cooperative is not satisfied the member has ceased violating the Cooperative's Rules
and Regulations of Service;
   (iv) The member has given the Cooperative a returned check to meet a payment arrangement
or pay a past due bill.

(i) The Cooperative shall not discontinue service for bill non-payment:
   (i) On a legal holiday or the day before;
   (ii) During the period from December 24 through January 2, inclusive;
   (iii) On any day the Cooperative cannot reconnect service;
   (iv) If the member enters into an agreement with the Cooperative for payment of the
delinquent billing over a reasonable time and the member complies with the payment
arrangements;
   (v) If the member owes the Cooperative money due to a meter or other billing error and the
member complies with payment arrangements;
   (vi) At a previous address for a different class of service;
   (vii) Of non-Cooperative service or merchandise;
   (viii) If a member is paying bills on time, even though a former member with an undisputed
delinquent bill for service resides or conducts business at the same address;
   (ix) If a Cooperative bill is in dispute and the member duly pays the Cooperative bill or bill
portion that is not in dispute.
   (x) If the temperature is forecasted by the National Weather Service or other reputable
source to be below 32° F in the impending 48 hours, or if conditions are otherwise
especially dangerous to health and the member is:
      (a) Unable to pay for service in accordance with the Cooperative's billing requirements
and is actively seeking government assistance or has exhausted such assistance; or
      (b) Able to pay for service in installments only.

Date Issued: August 29, 2017
By: Brian Heithoff
(j) The Cooperative shall assist elderly and handicapped persons who are unable to pay their Cooperative bills with determining available government assistance.

(k) The Cooperative may discontinue service to a member without advance notice for reasons of safety, health, cooperation with civil authorities, fraudulent use, tampering with or destroying Cooperative service facilities or member failure to comply with the Cooperative’s curtailment procedures during supply shortage.

(l) Upon a member’s or legally authorized person’s request, the Cooperative shall make reasonable efforts to discontinue the member’s service as requested. The Cooperative performs these types of discontinuations during normal business hours.

**DISCONTINUANCE UPON ADVANCE NOTICE**

The Cooperative will mail a Notice of Disconnect to the mailing address that is on record in the member’s account. This notice will be included on their monthly bill and shall state the disconnect date. Should a member opt out of receiving the paper billing statements, this notice will be on the electronic version of the bill that they can obtain on the e-bill site.

A Cooperative employee or representative will make an attempt to contact the member at the telephone number. The Cooperative may also attempt to contact the member with an email address provided to the Cooperative. Emails will be sent with a “read receipt”. All contacts will be documented in the member’s account.

Should the member be contacted, and the delinquent energy bill and fees paid, no further action need be taken by the Cooperative. If not paid, service will be discontinued.

In the event that this member is up for discontinuation, and the member’s account does not have a current telephone number or email address on record, the Cooperative shall place a hang note in an obvious entryway, when available, with the following data:

1. Name of Cooperative;
2. Date and hour of data entry;
3. Statement that should the energy bill not be paid; the service will be discontinued 24-48 hours from the date and hour shown.

The member will be charged the Collection Fee listed in the Schedule of Fees. The member is allowed one hang-note at the physical property in a twelve-month period. In the event the member is up for discontinuation of service in the following eleven months, the member will not receive a hang-note, but will be up for disconnect on the date of the disconnect notice, if authorized by Commission rules.
RECONNECTION OF DISCONTINUED SERVICE

When service has been discontinued for violation of the Cooperative's Rules and Regulations of Service, non-payment of bills or fraudulent use of service; and the member desires the service to be reconnected, the Cooperative may require the member to pay in full all bills due for service rendered up to the date service was discontinued, plus the reconnection charge. The Cooperative may elect to accept a payment arrangement with the member. Upon satisfaction of reconnection requirements, the Cooperative shall restore service as soon as practicable. The Cooperative shall not charge to reconnect service when discontinuation was improper. The reconnection charge amounts are shown on Sheet No. 58.

MEMBER'S RESPONSIBILITY

COOPERATIVE EQUIPMENT

The member shall not permit anyone who is not an agent of the Cooperative to remove or tamper with the Cooperative's property.

CHANGES IN MEMBER'S ELECTRICAL EQUIPMENT - NOTIFICATION

All equipment supplied by the Cooperative for use by each member has a definite capacity. In the event a member shall add to the size of his electrical equipment, he shall notify the Cooperative so that its transformer, meter, and other related equipment may be enlarged sufficiently to support for the increased load.

The member, when failing to advise the Cooperative of changes in a timely fashion, assumes responsibility for any subsequent damage to his property.

Failure to give such notice shall render the member liable for any damage to meters or accessories, transformers, or wires, of the Cooperative caused by the additional or changed installation.

NOTICE OF TROUBLE

The member shall give immediate notice at the office of the Cooperative of any interruptions or irregularities or unsatisfactory service and any defective facilities known to the member.
RESALE OF ELECTRICITY

The Cooperative shall not furnish electricity to any member or non-member for purposes of resale. As specified by the Wyoming Public Service Commission in Chapter 3, Section 36:

(a) The direct sale of a utility commodity by a person without a certificate of public convenience and necessity is prohibited.

(b) A direct sale of the utility commodity takes place if a person separately charges tenants or other persons for a utility commodity.

(c) This Rule does not apply to:

i. The provision of utility commodities in connection with the leasing or rental of facilities for less than 15 days' occupancy; or

ii. Otherwise exempt pursuant to Wyoming Statute § 37·1·101(a)(vi)(H).
FRAUDULENT USE OF ELECTRICITY

In the event of fraudulent use of electricity, or evidence of attempted fraudulent use of electricity, such as tampering with metering equipment, breaking of meter seals, jumpering of metering equipment or service wiring, is discovered, the Cooperative shall have the right to discontinue service, without notice, to the member or non-member.

Service will not be resumed to the member, until such member shall have paid all bills due the Cooperative, including the electricity fraudulently consumed, together with any damage to the meter, metering equipment, or Cooperative facilities, and has made any necessary or required changes in the member’s wiring to eliminate unsafe conditions or fraudulent installations, or unless ordered resumed by the Commission.

In addition, the regular reconnection charge will be paid by the member.

If it is shown to the satisfaction of the Cooperative that the member had no connection with, or knowledge of, such fraudulent use of electricity, his service will be restored without charge.
ATTACHMENTS TO COOPERATIVE FACILITIES

Attachments to the Cooperative’s poles and other equipment shall only be allowed after the execution of special joint use contracts, specifying, but not limited to, fees, drawings of attachment(s) and term of contract.

Attachments not negotiated for by the owner and agreed to by the Cooperative, with a joint use contract, may be removed by the Cooperative.

Upon discovery of an unauthorized attachment, the owner, if known, shall be allowed ten (10) days to remove same. If the attachment is believed to cause an unsafe condition, the attachment will be removed upon discovery.

The removed attachment shall be held at the Cooperative’s home office for ninety (90) days and may be reclaimed by payment of the labor and transportation costs incurred by the Cooperative to remove the attachments.

After ninety (90) days the attachments shall become the property of the Cooperative.

IDLE SERVICE

In order to meet and maintain current operating costs as well as principal and interest payments, all line constructed or energized must produce sufficient revenue.

Idle service facilities shall be dismantled and removed from their location after being idle for two (2) years and where it is reasonable to assume that the service will not be reconnected within one year.

The idle service classification may be changed by the property owner on whose property the idle service is located, by applying for service and paying not less than the filed minimum for the appropriate class of service. The service will not be removed until such time as the service minimum is not paid.

METER TEST

METER TEST REQUESTED BY MEMBER

If the member requests a test of the accuracy of the Cooperative’s meter used on the member’s premises, the following provisions shall apply:

- If the meter has not been tested within 12 months, the Cooperative shall perform the test within a reasonable time without charge to the member. The Cooperative shall notify the member of the time when the Cooperative will conduct the test so the member or the member's representative may be present.
- If the meter has been tested within 12 months, the Cooperative shall notify the member the cost to perform the test. Upon receipt of payment, the Cooperative shall notify the member of the time when the Cooperative will conduct the test so the member or the member's representative may be present.
- The Cooperative shall promptly advise the member of the test results.

If a meter is found to be in non-compliance with the Cooperative’s approved meter testing program, the Cooperative shall refund the payment the member advanced for the meter test and shall repair or replace the meter. The Cooperative shall also adjust and refund to the member the overpayment of preceding bills, pursuant to W.S. § 37-2-218. No refund is required from the Cooperative except to the member last served by the meter prior to testing. If the Cooperative has under collected, the member shall pay the adjusted costs back to when the error transpired but no greater than 183 days prior to the meter being shown in error, pursuant to W.S. § 37-2-222.

The meter accuracy test charge amount is shown on Sheet No. 59.

METER TESTING SCHEDULE

The Cooperative shall test or cause to be tested all single and poly phase solid state meters installed in member's premises in accordance to the following:

Based on the "General Theory of Operation," the Cooperative will utilize random sampling program to statistically verify meter accuracy for self-contained meters and ratio and burden for instrument transformer installations according to American National Standard Institute for Electric meters code for Electricity Metering (ANSI C12.1-2008) for testing and the American National standard Sampling Procedures and Tables for Inspection by Variables for Percent Nonconforming (ANSI / ASQ Z1.9-2008) for sampling.

All in-service billing / revenue meters, in the Cooperative’s service territory, will be divided into homogenous test groups based on date of purchase. A random sample from each homogeneous lot will be selected, tested, and statistically analyzed in accordance with ANSI / ASQ Z1.9-2008 Tables A-1, E-2 and B-3 for a double specification limit, variable unknown, and standard deviation method with 2.5 acceptance quality limit value for upper and lower specification limits combined, Inspection Level II and Normal Inspection. The statistical sampling program conforms to the guidelines provided by ANSI and the Tables for Inspection by Variables for Percent Nonconforming (ANSI / ASQ A1.2008). Based on analysis of Cooperative historical test data for electronic meters and recommendations by ANSI Standard C12.1-2008, the random sample test program as described, will begin the sixteenth (16) year of the meter service and annually thereafter.

The Cooperative shall retain a meter test record of all electric meters for the life of the meter. The meter test record shall indicate:

a. Manufacturer
b. Serial Number
c. Type
d. Capacity
e. Date of Purchase
f. Date of test
g. Type of test
h. Reason of test
i. Reading before the test
j. Accuracy percentage at each tested load
k. Current Locations

Date Issued: August 29, 2017  
By: Brian Heithoff

PUBLIC SERVICE COMMISSION  
APPROVED:  
Date Effective:  
Title:  
Docket No.:  
STATE OF WYOMING  
10015-0065-CT-18
Subsequent tests of the meter will be stored in addition to the original factory meter test. A record of the names and addresses of all members with the serial number of related meter(s) will be retained for a minimum of three years.

The Cooperative shall cause the master meter test standard used to perform meter test and calibrations:

a. to be housed in a temperature stable environment;
b. to be calibrated annually by an instrument with a higher degree of accuracy that is traceable to the National Institute of Standards and Technology.

Any tools, rubber gloves, equipment, etc. will be maintained, tested, and certified in accordance with manufacturer's recommendations and standard safety requirements.
OTHER SERVICES

WORK BEYOND POINT OF DELIVERY OF SERVICE

The Cooperative shall perform no work for a member beyond the "point of delivery" of electric service, except when necessary, during an emergency, if, by so doing, it will prevent possible injury or death to people and animals or avoid damage to property and equipment.

PROVIDING CLEARANCE FOR HOUSE AND EQUIPMENT MOVING

Where a house, structure, or equipment is to be moved upon, across, or over roadways, or along a way over which electric wires are in place, advance notice in writing is to be made to the Cooperative of the dimensions of the object being moved, the time it will be moved, and the exact route over which it will be moved.

Payment shall be made in advance to the Cooperative of the cost of providing clearance of electric lines for the move.

In no case, shall anyone other than authorized employees of the Cooperative remove, cut, raise, or handle any wires in connection with the moving and providing of clearance.

RELOCATION OF COOPERATIVE FACILITIES

Upon request from a member to move or relocate power line poles, anchors, services, meters, etc., each request will be investigated and considered individually.

If such move is necessary and will improve the quality of service or eliminate hazardous conditions or prevent a recurrence of tampering or diversion of electric service, the Cooperative will bear part or all of the cost of relocation. The amount of such expense to be paid by the member, if any, will be determined by the Cooperative.

- continued -
RELOCATION OF COOPERATIVE FACILITIES - continued

Where the relocation is solely for the benefit and convenience of the member, the cost will be borne entirely by the member.

Relocation of a meter installed on a building, house, or structure at the request of the member to another place on the building, house, or structure shall be paid for by the member.

SECURITY LIGHT - RELOCATION

Following the initial installation of a security light on an existing pole, the Cooperative will, upon request, relocate the light.

Relocation of a security light - when requested by the member - and involving other facilities installed to serve the light, shall be paid for by the member. Such charges shall be those actually incurred by the Cooperative in the relocation of the light and related facilities.

Sheet No. 

LOCATION OF METERS

The meter may be installed on a pole, pedestal or the service structure in compliance with National Electric Safety Codes (NESC) and National Electric Code (NEC) requirements, as applicable.

Meters and associated devices shall be installed in a reasonable location accessible for reading, testing, inspection, removal and where such activities will minimize interference and inconvenience to the member and the Cooperative. Under no circumstances shall any meter be removed or relocated except by authorized Cooperative personnel.

The Cooperative will furnish appropriate metering at the point of connection to the member. The member shall provide and maintain, without cost to the Cooperative, a suitable location accessible for metering and installation of equipment required to provide service. The Cooperative has the right to clear its service conductors, connections and right-of-way of any interfering tree, shrub or other obstruction or to require the member to clear and remove the interfering obstruction at the member’s expense.

A meter when installed shall to readily accessible to authorized Cooperative personnel for meter reading, testing and maintenance, and shall not be subject to server vibration, dust, vapors, or corrosive liquids.
ACCESS TO PREMISES AND RIGHT-OF-WAY

ACCESS TO PREMISES

Authorized Cooperative personnel shall have access at all reasonable hours to premises of members for the purpose of inspecting wiring and apparatus, removing or replacing the Cooperative's property, reading of meters, determining power factor, trimming trees, and all other purposes incident to the supplying of electric service.

RIGHT-OF-WAY

Without reimbursement by the Cooperative, the member will furnish to the Cooperative permits, certificates, and/or right-of-way satisfactory to the Cooperative across the property owned or controlled by the member for the Cooperative's distribution power lines or extensions thereof necessary or incidental to the supplying of service to the member.

The Cooperative will use reasonable diligence in protecting the property owner when providing or maintaining service line connections.

POINT OF DELIVERY OF ELECTRIC SERVICE

The point of delivery of electric service shall be at the point at which the electric supply system of the Cooperative connects to the wiring system of the member.

For overhead construction, the point of delivery is that point where the Cooperative's overhead service drop connects to the member's service conductors whether located on a building, structure or pole.

For underground construction, the point of delivery is that point where the Cooperative's service lateral connects to the member's service entrance conductors - usually the metering point - whether on a building, structure, pole, or pedestal.

Where the point of delivery is on a building or other structure, will normally be at the weatherhead of the electric service entrance. The electric service entrance will normally contain the meter base and be located on the building or other structure to which overhead service is being supplied. When underground service is furnished, the point of delivery will be to the line terminal lugs of the meter base.

Location of the point of delivery shall be designated by authorized Cooperative personnel prior to the start of construction of the member's facilities, and shall be agreeable to both parties.
MEMBER WIRING AND INSPECTION

MEMBER'S WIRING

All electric wiring and equipment installed on the member's side of the "point of delivery" shall be at the member's expense, and shall be installed and maintained in accordance with the requirements of the National Electrical Code as adopted by the Commission in its Rules and with all requirements prescribed by governmental authority having jurisdiction thereof. The Cooperative reserves the right to refuse to connect to any wiring or apparatus which does not meet these requirements, and the Cooperative may without further notice discontinue service to any member when a defective condition of wiring or equipment upon the premises of the member is discovered.

The Cooperative will not be responsible for any loss, injury, or damage which may result from defects in electric wiring or equipment on the member's premises.

INSPECTION OF MEMBER'S ELECTRIC SYSTEM

The Cooperative shall have the right, but does not assume the duty, to inspect the member's electrical facilities from time to time, and to refuse to commence or continue service if an installation fails to meet code requirements, is defective or hazardous, or for any other reason considered to be an unsafe operating condition. Cost of repairing Cooperative equipment, resulting from defective member's wiring, will be charged to the member.

MEMBER SERVICE REQUIREMENTS

TYPE OF SERVICE CONNECTION

All lighting and power installations shall be either three (3) wire or four (4) wire connections, and the member’s wiring shall be arranged so that all single-phase or three-phase service shall be taken through one meter.

MINIMUM SERVICE CONNECTION

No service connection of less than three wires shall be made to a member’s single-phase electric installation consisting of more than two (2) circuits.

NUMBER OF SERVICES TO A BUILDING

In general, a building or other premises shall be served through only one set of service conductors.

At the option of the Cooperative, more than one service to a single member at one location will be permitted when the physical or electrical characteristics of the facilities served require more than one service in the interest of good engineering and operating practices.

POINT OF ATTACHMENT TO BUILDING OR POLE

The point of attachment of a service drop to a building shall conform to the applicable edition of the National Electric Safety Codes (NESC).

SUPPORT FOR SERVICE DROP ATTACHMENT

When service wires are attached to a building or pole, a substantial means of support and attachment is to be provided by the member or his contractor. The type and location of the support shall be coordinated with an authorized representative of the Cooperative.

In case the building or pole is not of sufficient height for conductors to be at least ten feet (10') from the ground, the member shall furnish, install and maintain an adequate fixture to which the service wires may be attached.

- continued -
SERVICE ENTRANCE WIRING

Service entrance wiring raceways are to be terminated on the exterior of the building at a point six inches (6") or more above the service drop attachments to prevent the entrance of moisture. The service entrance and the service drop conductor connections are to be made at a point below the level of the rain-tight service head.

The member’s service entrance conductors shall extend not less than thirty inches (30") outside the service head to permit proper attachment to the service drop wires.

Service entrance conductors shall be carried in approved metal raceways, and the distance to the main switch shall be as short as possible. The size of the raceway and ampacity of the conductors shall be maintained between the service head and the main discontinue device.

The size, capacity, and installation of the electric service entrance and related equipment shall be in conformity with the requirements of the National Electrical Code (NEC), Cooperative Rules and Regulations of Service, and any applicable state and local codes.

Service entrance cable will not be acceptable in service entrances connected to Cooperative lines.

SERVICE EQUIPMENT

The member shall install a fused main discontinue, or circuit breaker main discontinue on new services between the Cooperative’s meter and the member’s service wires.

LOAD BALANCE

In every instance, where possible, the member’s wiring installation shall have a sufficient number of branch circuits, and be so connected that the load on each side of the supply neutral conductor shall be as nearly equal as is practical.
THE PUBLIC SERVICE COMMISSION OF WYOMING

NAME High West Energy, Inc. Wyo. P.S.C. Tariff No. 4
ADDRESS P.O. Box 519 Original Sheet No. R43

Cancels Sheet No. __

Pine Bluffs, WY 82082

GROUNDING

The member's wiring system shall be efficiently grounded as required by the National Electrical Code (NEC) or applicable state and local codes.

LOW POWER FACTOR EQUIPMENT

Should the member install any electrical device or devices creating a low power factor, the Cooperative may require the member to provide at his own expense power factor corrective equipment which will maintain the power factor of each such device at not less than ninety (90%).

All motors of twenty horsepower or more shall be equipped with (power factor improvement) capacitors.

Such corrective equipment should normally be installed in the circuit between the low power factor devices and the switch controlling the devices in such a manner that the corrective equipment will operate only when such devices are in operation.

INTERMITTENT AND FLUCTUATING LOADS

Where hoists, cranes, elevators, furnaces, welding machines, radio and X-ray equipment, or any other equipment is operated in such a manner that it has a disturbing influence on the service to other members, the Cooperative shall reserve the right to require the member to install suitable equipment, at his own expense, that will isolate or reduce the disturbing effect to levels or limits acceptable to the Cooperative.

HARMONIC CORRECTION

Should the member's equipment introduce harmonics in the Cooperative's system, such harmonics shall be less than the limits stated in the Institute of Electrical and Electronics Engineers (IEEE) standard 519 regarding acceptable harmonic levels. If standard 519 is not met, Cooperative shall reserve the right to require the member to install suitable equipment at their own expense to reduce harmonics such that the Institute of Electrical and Electronics Engineers (IEEE) standard 519 is met.

Date Issued: August 29, 2017
By: Brian Heithoff

PUBLIC SERVICE COMMISSION
APPROVED

Date Effective: AUG 17, 2017
EFFECTIVE: CEO/General Manager

STATE OF WYOMING
ALLOWABLE MOTOR STARTING CURRENTS

Motors with the following voltage ratings may be started across-the-line if the starting current (which is the locked rotor current of the motor at name plate voltage) does not exceed the limits shown in the following table:

<table>
<thead>
<tr>
<th>Nominal Name Plate Voltage</th>
<th>Phase</th>
<th>Maximum Locked Rotor Current</th>
</tr>
</thead>
<tbody>
<tr>
<td>120 volts</td>
<td>Single</td>
<td>50 amperes</td>
</tr>
<tr>
<td>208 or 240 volts</td>
<td>Single</td>
<td>200 amperes</td>
</tr>
<tr>
<td>208, 240 or 480 volts</td>
<td>Three</td>
<td>200 amperes</td>
</tr>
</tbody>
</table>

Groups of motors starting simultaneously shall be classed as one motor.

If the frequency of starting a motor or group of motors, as shown in the preceding table, should have a disturbing influence on service to other members, the Cooperative shall reserve the right to require the member to install suitable equipment, at his own expense, that will reduce the disturbing effect to levels or limits acceptable to the Cooperative.

Across-the-line motor starting currents larger than those shown in the preceding table may be permitted where the Cooperative's facilities are adequate and the frequency of starts are such that other members' service will not be adversely affected.

If such request is made by the member, the Cooperative will make individual studies to determine the maximum allowable starting current for each specific installation, and, if necessary, will advise the member as to the type of motor starting device needed.
CONSTRUCTION SCHEDULE

Priorities, or order of construction of new services, shall be in the same relationship in which payments of memberships, construction advances and service charges, as applicable, are received by the Cooperative and consistent with good management.

STANDARD LINE EXTENSION POLICIES

GENERAL SERVICE LOADS UP TO 1,000 kVa
The Cooperative's Standard Extension Policies govern the extension and furnishing of electric service to
its members. The Standard Extension Policies shall be considered in conjunction with the provisions of the
Cooperative's various rate schedules and other provisions of these Rules and Regulations of Service.

a. General Service of Permanent Character for residential services, and farm, ranch, or small business
   services of less than 101 kVa of installed capacity.

   The Cooperative shall install the value of one span of single-phase overhead line, without cost,
to the applicants.

   All extension costs beyond that of the cost of one span of single-phase overhead line, up to
   $15,000, will require a minimum of 50% of the estimated cost in excess of the value of the one
   span as a contribution in aid of construction, to be paid prior to commencing construction. One
   span of single-phase overhead line is defined as a meter, wire, transformer and one pole and
guy.

   The member shall sign a contract for 5 years, guaranteeing revenue based on 2% per month of
   the cost of construction, less contribution in aid of construction.

   All extensions requiring cost of construction over $15,000 will require a 100% contribution in
   aid of construction in excess of $15,000.

   A permanent structure constructed within the service area of the Cooperative shall be served
   by the Cooperative under the applicable rate without extra cost to the member, other than the
   minimum bill as stated in the rate schedule and the contract term as called for under this line
   extension policy. On completion of the 5-year contract term, the minimum shall be as filed with
   the rate schedule for the member class.
b. Ranch, farm, commercial, industrial services of 101 kVA of Installed capacity or above.

The Cooperative shall extend its lines, without cost, to a ranch, farm, commercial or industrial applicant with at least 101 kVA of installed capacity unless the cost of the connection and extension shall exceed three (3) times the estimated annual revenue less estimated power costs.

All extensions exceeding the limit of free extension cost will required 100% of the estimated cost in excess three (3) times revenue less power costs as a contribution in aid of construction to be paid prior to commencing construction.

When estimating revenue and power costs, the Cooperative will use its experience and expertise to make these calculations. Input from the applicant will be considered, however, if there are unknowns or discrepancies, the Cooperative will err on its side. If after 12 months of operation, the applicant is using more power than originally estimated by the Cooperative, the contribution in aid of construction will be recalculated and a refund provided, if requested. Likewise, if after 12 months of operation, the applicant is using less power than originally estimated by the Cooperative, the contribution in aid of construction may be recalculated and an additional contribution in aid of construction required.

Line extensions to commercial or industrial applicants that desire or require a non-tariffed retail rate will be made on a case-by-case basis and subject to the approval of the CEO/General Manager. In these cases, the contribution in aid of construction will normally be 100% of the cost of construction paid prior to commencing construction.

GENERAL SERVICE LOADS UP TO 1,000 kVA - continued

c. Indeterminate Service - Less than $15,000 investment:

Indeterminate electric service is service where the indications are that its use in the location will be for an indeterminate period of time and indeterminate revenue. Extensions for this type of service shall be considered under the following policy.

The Cooperative shall require from the member, a payment of estimated cost of installing and removing the facilities, plus the estimated costs of material to be used which will be unsalvageable after removal of the installation.

d. Temporary Service:

A temporary service for short term use will require the member to pay all costs, in advance of construction, for making the service connection and extension, and removing the facilities after service has been discontinued. When facilities are removed, the member shall be refunded the material salvage value.

The rate schedule applicable for the member's class of service shall be applied in its entirety during the period for which service is furnished.

SERVICE TO LOADS OF 1,001 kVA AND ABOVE

The Cooperative may provide electric service to loads of 1,001 kVA and above under a special contract.

SERVICE TO LOADS OF 1,001 kVA AND ABOVE - continued

The Cooperative shall take into consideration when preparing such contracts to serve loads of 1,001 kVA or more, the following:

A. Investment in extension of facilities to serve.
B. Estimated annual revenue produced by the load.
C. Terminated risks, including duration of service and member's credit.
D. Initial term of contract.
E. Unusual fluctuation or disturbances to the Cooperative's system.
F. Special equipment necessary to provide non-standard voltage or above normal continuity of service.
G. Other load characteristics, seasonal or otherwise.
H. Removal costs less salvage value.

SERVICE TO MOBILE HOMES
When situated on land owned by the member and installed in a permanent manner, that is, wheels removed, set on a foundation and skirted, the service will be considered as “Service of a Permanent Nature.”

When situated on land not owned by the member or not installed in a permanent manner the service shall be considered to be “Indeterminate” or “Temporary.”

SERVICE TO A RESIDENTIAL SUBDIVISION

Electric service to a platted residential subdivision where the developer wants the entire electrical distribution system installed at one time shall be provided under the following terms.

The developer shall deposit with the Cooperative a sum equal to the estimated cost of the project under the terms of an eight (8) year contract. Such deposit shall be paid to the Cooperative before construction is started on the extension to serve the subdivision.

PUBLIC SERVICE COMMISSION
Date Effective: APPROVED
TUE, SEPT/General Manager

STATE OF WYOMING
SERVICE TO A RESIDENTIAL SUBDIVISION - continued

No interest shall be paid on the sum of money deposited with the Cooperative.

Once each year, for a period of eight (8) years, the Cooperative shall refund to the developer – for each lot connected and receiving service during the year, a sum equal to the total cost of service divided by the total number of platted and developed lots in the subdivision. It will be the developer's responsibility to request the annual refund by providing a list at year-end of the lots connected and receiving service.

In no case will the amount refunded exceed the amount paid to the Cooperative, less (25%) percent. At the end of the eight (8) year term, any portion of the original deposit that has not been refunded to the developer shall become the property of the Cooperative. The Cooperative will act on all annual refund requests within 60 days of receipt and will grant a 60-day grace period for the final payment at the end of the eight (8) year term.

An alternate method of obtaining service shall be for the developer to have services installed on each lot with the appropriate meter and then pay monthly, for eight years, a minimum bill which will amortize the total cost of service within 8 years. The developer shall continue the required minimum bill payments for each lot until the service has been transferred to a new owner.

Each residence shall be served through an individual meter at a location acceptable to the Cooperative and the developer.

Prior to any actual construction of Cooperative electric service facilities to the subdivision, the developer shall furnish the Cooperative with a copy of the platted subdivision showing street, sewer and Cooperative layout and easements, along with any other information needed in the design and location of Cooperative facilities.

The developer of the subdivision shall furnish at no cost to the Cooperative any easements on the property necessary to provide electric service.

Each residence served in the subdivision shall be billed under the applicable residential rate schedule.

SERVICE TO A RESIDENTIAL SUBDIVISION - continued

In the case of subdivisions that consist of at least two (2) units per acre, the Cooperative may allow a letter of credit to be substituted for the up-front deposit that would only be called if more than 25% of the lots do not have housing units connected after eight (8) years.

The Cooperative reserves the right to negotiate alternative terms that are in the best interest of the developer and the Cooperative on a case-by-case basis.

SERVICE TO A COMMERCIAL DEVELOPMENT

Electric service to a platted commercial subdivision, where the developer wants the entire electrical distribution system installed at one time, shall be provided under the following terms.

The developer shall deposit with the Cooperative a sum equal to the estimated cost of the project under the terms of an eight (8) year contract. Such deposit shall be paid to the Cooperative before construction is started on the extension to service the subdivision.

No interest shall be paid on the sum of money deposited with the Cooperative.

Upon services being connected within the development, the Cooperative shall estimate the incremental three years' annual revenue less three years' estimated power costs. The Cooperative will refund the results of the calculation to the developer. The Cooperative will track the construction costs, revenues and power costs so that any additional connected services result in the proper and timely refund.

At the end of eight (8) years, any portion of the original contribution that has not been refunded to the developer shall become the property of the Cooperative.

The Cooperative reserves the right to negotiate alternative terms that are in the best interest of the developer and the Cooperative on a case-by-case basis.
SERVICE TO MOBILE HOME PARKS

Electric service shall be provided by the Cooperative through an individual meter to each space within a mobile home park.

Billing for each space shall be under the applicable rate schedule.

The mobile home park owner shall be required to sign a contract for service which will amortize the total cost to serve over the contract period. Each lot shall be obligated for a minimum bill and when not rented, the owner shall be billed the minimum for the spaces not rented.

The mobile home park must be designed to accommodate mobile homes as opposed to travel trailers.

The owner of the mobile home park shall furnish and install the necessary service equipment at each mobile home space for discontinuation of the Cooperative's service drop (if overhead) or service lateral (if underground). The service equipment shall be mounted on a service pole provided by the Cooperative, or service pedestal provided by the park owner.

Meters and meter bases will be furnished by the Cooperative. Meter bases shall be installed by the Cooperative. Ownership of the meter and meter base shall remain with the Cooperative. Service pedestals, main discontinues, and underground conductors shall be owned by the mobile home park owner.

The owner of the mobile home park shall furnish at no cost to the Cooperative any easements on the property necessary to provide electric service to the mobile home park.

Prior to actual construction of electric service facilities to the mobile home park, the owner shall furnish to the Cooperative a plat of the park layout showing street, sewer, Cooperative easements, and other information needed in the design and location of the Cooperative's distribution system.
UNDERGROUND EXTENSIONS

Upon application by a member, builder, or developer, for an extension by the Cooperative of underground, primary, and secondary distribution facilities, the Cooperative may install such facilities under the following terms.

The applicant shall pay, to the Cooperative, an amount equal to the estimated cost of such underground construction in excess of the estimated cost of overhead construction of required primary and secondary facilities prior to the allowances being calculated, unless otherwise approved by the Cooperative Engineering Manager or CEO/General Manager.

Any work, construction, or furnishing of facilities required of the member, builder, or developer for such installations shall be performed in accordance with the Cooperative's specifications and be coordinated with the Cooperative's representatives.

Underground service shall not be provided by the Cooperative to a member installation considered to be temporary or indeterminate as to the length of time service will be required.

CONTRACT TERM

The standard contract term for electric service under the Cooperative's filed rate schedules shall be as follows:

a. Members requiring an extension of Cooperative secondary or primary lines to provide service in addition to the transformer, meter and service drop shall sign a five (5) year contract minimum.

b. Special contracts may be granted by the Board of Directors, however, the member will pay the minimum bill or 2% per month of the balance of the cost of construction (whichever is higher).

REFUNDS FOR ADDITIONAL TAPS OFF A LINE EXTENSION

Applicants who pay a contribution for a line extension may be eligible for a refund when new line extensions connect into their project. The following outlines the provisions of the refund:

a. The refund applies only to primary line extensions and facilities.
b. Refunds will be based on a prorated sharing of the contribution for the portion of the line shared.
c. The window of opportunity to receive a refund is limited to five (5) years from the completion date of the initial construction, or the total of all the refunds made to the original contributor sum up to 80% of the initial contribution, whichever comes first.
d. The minimum refund shall be $2,500.
e. Only the original member who installed the original line extension may receive the refund. A change of property or facility will not apply.
f. The line extension sharing may only be split among a maximum of three (3) groups and/or individuals, including the original applicant(s).
g. The member eligible for refund may waive, in writing, the owed line extension refund for new line extensions connecting into the original project. Each waiver will be treated as a refund for the purposes of calculating any future refunds within the five (5) year refund period.

TYPE OF SERVICE

Single-phase service is standard.

Three-phase service, when available and economically feasible, may be furnished upon written application from the member. This type of service will be furnished at standard Cooperative voltage and under standard Cooperative line extension policies.

Billing shall be under the applicable rate schedule for the class of member being served.

          ___________  ___________
          Sheet No.  

TYPE OF SERVICE - continued

Three-phase service shall be available for three-phase motors of 10 horsepower and larger, or smaller size motors with a total connected capacity of 10 horsepower or more. All motors exceeding 10 horsepower will be three-phase.

Where service is provided through one central meter, the member shall furnish, install, and own all electric facilities beyond the point of delivery.

The minimum bill for three-phase and single-phase service shall be as called for in the applicable rate schedule after term of contract has been completed.

DETERMINATION OF LENGTH AND COST OF AN EXTENSION

For purposes of measuring extensions, the distance shall be measured along lines of proper construction from the nearest point of connection to the point of delivery of the property to be served, as determined by the Cooperative. Consideration will be given to right-of-way and other obstacles.

LINE EXTENSION OWNERSHIP

Every extension shall at all times be the property of the Cooperative, regardless of whether a deposit or contribution is made in aid of construction.

RIGHTS-OF-WAY

The member shall furnish a written easement for the location of the Cooperative’s service facilities upon member’s premises.

In the event the member is not the owner of premises occupied by him, such member shall obtain or assist in obtaining from the property owner or owners the necessary easement for the installation, maintenance, and operation of the Cooperative’s service facilities on or under said premises.

PUBLIC SERVICE COMMISSION
APPROVED: AUG-17-2017

Date Effective:

Title: CEO/General Manager-
DOCKET NO.
STATE OF WYOMING
In any real estate development, wherein the Cooperative is requested or desires to install distribution facilities for service to existing and future members located therein, and the dedicated Cooperative easements are found to be insufficient for such installation, the owner (developer) shall, upon request, furnish any additional easements required for such installation by the Cooperative.

The Cooperative's obligation to render service to a member is contingent upon the Cooperative's ability to secure the necessary rights-of-way for its facilities across intervening properties.

Since the Cooperative's filed rate schedules do not provide for the cost of paying for rights-of-way for the construction of the Cooperative's distribution system facilities to provide electric service, the Cooperative must, therefore, rely upon the property owner to provide such right-of-way easements at no cost to the Cooperative.
